

Cure Dystonia Now's
2nd Annual
ROCKIN' FOR A CURE

Saturday, August 2, 2014
Great Neck, NY

You never know how a child's life can change until illness strikes. Two generations of the Miller family are afflicted with Dystonia and they know first-hand how devastating the neurological disorder can impact the quality of life. So they have banded together with friends and the community with the goal to **Cure Dystonia Now**.

Please join us for the 2nd Annual **Rockin' For a Cure** extravaganza, which promises to be an electric night filled with live music and DJ in support of finding a cure to this disorder. Come join us for this great opportunity to kick back on a comfortable summer night, enjoy good music, good food, good drink and good people in a picturesque setting overlooking the Long Island Sound with views of the NYC skyline.

We ask that that you help sponsor this worthwhile event by selecting from one of the following levels of support:

PLATINUM RECORD: \$10,000

- Logo/name prominently displayed on all event signage, print materials and website
- Full page in event journal

- Logo/name displayed on event website
- Half page in event journal
- 6 Tickets for the event

CLASSIC VINYL: \$1,000

- Name listed on event website
- 4 tickets for the event

Cure Dystonia Now is a non-profit 501(c)(3) public charitable organization committed to advancing research for more and/or improved treatments, and ultimately a cure, for Dystonia. Please see the following page for more information on Dystonia, our foundation and the type of research our foundation supports.

For further information, please contact
Marc Miller, (516) 584-4156 or marc@curedystonianow.org.

About Dystonia. Dystonia is a neurological movement disorder that causes involuntary muscle contractions, which force the body into abnormal, and sometimes painful, movements or postures. Dystonia affects men, women and children of all ages and backgrounds and causes varying degrees of disability and pain, from mild to severe. It is the third most common movement disorder behind only Parkinson's and Essential Tremor (estimates suggest that at least 300,000 – 500,000 people are afflicted in North America alone). There is presently no cure, but some treatment options exist and scientists around the world are actively pursuing research towards new therapies, and ultimately a cure.

About Cure Dystonia Now. Cure Dystonia Now is a public charitable organization that is run by volunteers and is working with researchers on cutting edge treatments and ultimately a cure for Dystonia. We are pleased to be working with several of the pre-eminent scientists in the field of Dystonia, who comprise our Medical and Scientific Advisory Council (MSAC). The MSAC conducts peer-review of research applications, sets the direction of research and makes recommendations to the Board for funding research. Cure Dystonia Now is a member of the Dystonia Coalition, a collaboration of medical researchers and patient advocacy groups supported by the Office of Rare Diseases Research in the National Center for Advancing Translational Sciences and The National Institute of Neurological Disorders and Stroke at the NIH.

More information about Dystonia and our organization can be found on our website at www.curedystonianow.org.
